Dream you're in a distant land with TROPICAL

Fishes in the jungle, corals in a blaze of colour and a heavenly rain of flowers

Exotic and very imaginative, somehow surreal, a little bizarre too - this is the impression you get from the new TROPICAL collection by the wallpaper manufacturer Hohenberger.

TROPICAL gives you a desire for colour and foreign shores. It satisfies the longing for new horizons and feel-good locations. The tropical mood is created by motifs from the plant and animal world. Shades of blue and green are reminiscent of water and palm trees. Accents of pink, violet and brick red are invigorating and very decorative. And if you want to bring the exotic into your home but with more subtle colours, you can opt for the fantastic motifs in neutral grey and beige shades. It always has the effect of making you feel you're in a far-off land.

What's special about the new collection is the freedom to create your own unique combinations.

The plant and animal motifs of the murals and wallpapers go wonderfully with our soft plain colours, hand-painted ornaments and beautiful chalk matt wall colours.

The technical sophistication of TROPICAL is also a real highlight: digitally printed designs dazzle on backgrounds with foam, gold and silver effects. For this purpose, traditional printing techniques are skilfully combined with the most modern digital printing processes - something only the wallpaper makers from Hohenberg have been able to achieve perfectly so far.

About the Hohenberger wallpaper manufactory

Now in the third generation, the Taubert family is still producing wallcoverings with a lot of craftsmanship and great attention to detail. In addition to being 100% PVC-free, wallpapers from Hohenberg are produced particularly sustainable and exclusively in Germany. They adorn castles and museums, bars and lounges, hotels and offices, shops and apartments – not only in Germany but around the world. At Heimtextil 2019, Taubert is set to present a total of three new collections.
