Playing with light

The UNIVERSE wallpaper collection is inimitably sophisticated

Every time of day has its own light and its own mood. Hence, rooms often feel very different in the morning to in the evening. Anyone keen to play with these moods will love UNIVERSE. Because UNIVERSE – the new collection from the Hohenberger wallpaper manufactory – does just that: it plays with light.

Glittering glass beads and genuine granite stones, shiny special effects and a combination of different surfaces and levels create extraordinary patterns on the wall. Depending on the incidence of light, colours shimmer with varying intensity, and reflections and gloss effects are produced. UNIVERSE impresses with unparalleled technical sophistication.

What's more, UNIVERSE is also a statement – an expression of Hohenberger's tradition and self-conception. Just like 70 years ago, manufactory-quality wallpaper is still produced here – creatively designed and perfectly implemented. The UNIVERSE collection is a masterpiece that shows off the impressive skills of the Hohenberger wallpaper manufactory.

About the Hohenberger wallpaper manufactory

Now in the third generation, the Taubert family is still producing wallcoverings with a lot of craftsmanship and great attention to detail. In addition to being 100% PVC-free, wallpapers from Hohenberg are produced particularly sustainable and exclusively in Germany. They adorn castles and museums, bars and lounges, hotels and offices, shops and apartments – not only in Germany but around the world. At Heimtextil 2019, Taubert is set to present a total of three new collections.
